EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Charles LeMaire on July 25, 2005.

The application has been amended as follows:

Please change the dependency of claim 98, from "claim 8" to "claim 7".

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a method of fabricating a thin-film battery wherein an electrolyte second film is deposited on a first film by depositing the electrolyte material using a deposition source and supplying energized particles from a second source such that the particles provide energy to the electrolyte material to deposit the electrolyte material into a film. The prior art of record fails to teach the two different sources to provide the electrolyte film. The prior art instead teaches cleaning the first film or substrate with one source and depositing the material with a second source. The apparatus for the depositing the electrodes and electrolyte as set forth in the claims is also not taught or suggested.
